

Mentor™ for Lotus iNotes™ Web Access

Master iNotes... As You Use It!

Now it's possible. If you can connect to the Web, you can connect to Notes®. No matter what machine you're using, Lotus iNotes Web Access gives you the power of Notes, from anywhere in the world.

The Challenge

But how do you realize the full benefit of iNotes before you know how to use all of its features? If you're using iNotes a thousand miles and three time zones from the office, where do you get help, when you need it?

Mentor Is the Answer

Mentor™ for Lotus iNotes Web Access delivers just-in-time support, where and when you need it, with over 90 short multimedia demonstrations covering the basic features to the more advanced.

No need to view hours of instructions or read pages of text. If you need to perform a task and don't know how, just click the Mentor button, pick your topic, watch, listen... then do it yourself.

What's Just-In-Time Support?

Mentor is to software what a vehicle navigation system is to cars. If you don't know how to get there from here...

1. You can get in your car and just start driving (that's what many of us do);
2. You can ask someone for directions (that's tech support);
3. You can read a road map and chart your course (that's training); or
4. You can press a button on your dashboard that displays your route and destination as it tells you, "Make a left in 800 feet" (that's just-in-time).

Just what you need to know, when you need it! Mentor makes users successful with new software, without phone calls, without a major time investment, and without training.

The Proof

Some of the world's largest companies rely on Mentor for this valuable support.

Over 6 million Mentors have been licensed to IBM, DuPont, DaimlerChrysler, 3M Corp, GE Capital, Canon, Colgate-Palmolive, Duke Energy, Reuters, Goodyear, ExxonMobil, Verizon, and Bayer, just to name a few. Six of the Fortune Top Ten use Mentor for a faster and greater return on their technology investment.

It's Easy to Use

Mentor™ for Lotus iNotes Web Access will stream from your company's server at connection speeds as low as 28.8 Kbps. Mentor delivers real-time multimedia right to your desktop without downloading. It's accessible through the Internet or an intranet, individual hard drives, or CD-ROM, at the click of button, without leaving the application.

If you're on a computer without sound, the Audio On-Off button allows you to choose between multimedia and non-audio versions.

What People Are Saying About Mentor

"Mentor's real-time method of teaching makes it easier for users to make the most of software. And the multimedia features of Mentor make it unique."

—Solutions Now, October 2001

"The major driver for using Mentor is that DaimlerChrysler doesn't want its people to have to wade through tons of information... Mentor is a tool where people can get exactly what they need and fast."

—Automotive Executive, April 2001

"Mentor provides users a natural way to keep themselves up-to-date, including enhanced Web integration, application customization, and file synchronization."

—The New York Times on the Web
October 10, 2000

"Mentor does an excellent job and eliminates many calls to the help desk."

—Exchange & Outlook, June/July 2000

"It actually speaks to you . . . helps you get the most out of your PC. It's like having your own personal tutor."

—Internet Service Provider, November 2000

"The software is a breeze to install and the topics are well organized."

—Tech TV, November 2001
